SUMMARY

Linux System Administrator with 3+ years of experience in managing and optimizing production Linux environments. Proficient in system monitoring, incident resolution, and infrastructure support, with strong expertise in Ansible automation and networking fundamentals. Hands-on experience with AWS services and committed to building scalable, secure, and high-performance systems.

Technical Skills

- **Linux Administration:** RHEL, Ubuntu, user & group management, LVM, file systems
- **Monitoring & Troubleshooting:** System logs, process monitoring, alert handling, incident response, root cause analysis
- **Networking:** TCP/IP, DNS, DHCP, IP addressing, firewall basics
- **Automation & Scripting:** Ansible, Bash (shell scripting)
- **Cloud:** AWS (EC2, IAM, VPC – hands-on)
- **Tools:** Git, JIRA (basic), ServiceNow (basic)

EXPERIENCE

Linux System Administrator April 2023 – June 2026
Winways Complete Open Source Pvt Ltd Madurai

- Managed and maintained Linux servers, ensuring high availability and performance of production systems
- Monitored system performance, logs, and alerts to proactively detect and resolve incidents
- Troubleshot system, network, and application issues, reducing downtime and improving reliability
- Automated routine administrative tasks using Ansible, reducing manual effort and configuration time
- Configured and maintained services including DNS, DHCP, SSH, and firewall rules
- Performed user management, storage configuration (LVM), and file system maintenance
- Implemented security best practices including firewall configurations and SELinux policies
- Handled incident tickets and collaborated with teams for timely resolution and escalation when required

Certifications

- Red Hat Certified Engineer (RHCE)
- Red Hat Certified System Administrator (RHCSA)
- Deloitte Cyber Simulation (Forage), Feb 2026 – Gained practical experience in cyber security tasks and threat analysis
- Masterclass in Cyber Security, NoviTech R&D Pvt. Ltd
- Python Programming Internship, YBI Foundation

PROJECTS

Infrastructure Automation using Ansible

- Automated package installation, user provisioning, and firewall configuration using Ansible playbooks
- Improved system setup efficiency and reduced manual configuration errors

Linux Server Administration & Configuration

- Managed RHEL servers including user access, storage (LVM), networking services, and firewall setup
- Ensured system stability through monitoring and troubleshooting

Secure Linux Server Hardening

- Implemented SSH hardening, SELinux policies, and firewall rules to enhance system security
- Reduced potential vulnerabilities in production environments

EDUCATION

B.Voc in Data Science – The American College, Madurai (2020 – 2023) | CGPA: 7.4
B.Sc Computer Science – The American College, Madurai (2019 – 2022) | CGPA: 7.2
